

GEMMA ANALYTICS

OFFER FOR AD-HOC HANDOVER SUPPORT

Two consultant days in calendar week 36

for

omos media GmbH

Lützowstraße 105/106, 10785 Berlin

– hereinafter referred to as "Client" –

by

Gemma Analytics GmbH

Chausseestraße 17, 10115 Berlin

– hereinafter referred to as "Gemma" –

Gemma offers ad-hoc support during calendar week 36 (31 August to 6 September 2026), so that questions arising from the completed handover can be resolved directly with the people who built the current setup.

Module	Pricing	Amount
Ad-Hoc Handover Support - On-demand support for the Client's internal data team on the existing BigQuery, dbt and Looker setup - Questions on the data models and the logic behind them - Walkthrough of pipeline and scheduling behaviour - Review of changes made since the handover - Pair-working on issues as they arise - Delivered remotely, called off in blocks agreed on the day	Budget (2 days)	EUR 2,900
	Total	EUR 2,900

The daily rate is EUR 1,450 (1 day = 8 hours). All fees are net of any applicable value-added taxes.

The two days are to be called off within calendar week 36 (31 August to 6 September 2026). Days not called off within that window lapse and are not invoiced, unless the Parties agree otherwise in text form. The days may be split into part-days by mutual agreement; part-days are billed pro rata against the daily rate.

Only the days actually called off are invoiced. Invoicing takes place at the end of the call-off window and is due 14 days after receipt.

The Client will, with appropriate support from Gemma, where applicable,

- Maintain Gemma's existing access to the repository, the Google Cloud project and BigQuery, and Looker, for the duration of the call-off window
- Make the internal data team available for the sessions called off, at times agreed on the day
- Provide the required credentials for any source not already provisioned to Gemma

Please note that data models and reports can only be created to the extent that the data exists in the aforementioned sources.
